# 12 MW – Bulgaria

May 25, 2010

## Basic project figures

### Wind turbines:

6 Vestas V90-2.0 MW 105 m hub height

### Status of the project:

Building permissions for 4 turbines were issued in February 2009. Building permission for additional 2 turbines is expected in the end of July 2010.

Final Grid Connection Agreements for 8 MW were issued in July 2009, and Final Grid Connection for additional 4 MW is expected in the end of August 2010.

The erection of the turbines will be in Q3/Q4 2010

The start of operation of the project will take place at the end of Q4 2010

### Feed-in tariff:

Feed-in tariffs (April 2010 - March 2011) are:

Production up to 2,250 full load hours annually: 190.59 BGN (EUR 97.45)/MWh

Production exceeding 2,250 full load hours annually: 174.44 BGN (EUR 89.19)/MWh

There is a 15 year obligatory power purchase warranty.

Minor annual tariff adjustments may occur within legislative boundaries. Possible adjustments will be effective from April 2011.

### Energy production:

7.6 m/s - Mean wind speed at hub height

38 % Capacity factor Net P50

3,357 Full load hours Net P50
